

MIDTERM EXAMINATION
1st Semester, AY 2026 – 2027

Course Title: ITFE403A - AngularJS
Instructor's Name: Chiara Marie C. Canque
Allotted Time: 2.5 hours
Highest Possible Score: 100
Score per Test Part: I - 100

Name: PITOGO, BONNA MAE L.

Date: SEPTEMBER 15, 2026

Instructions:

This is an **open-notes examination**. Examinees may use their existing notes and CTF 1–7 materials. **The use of AI tools and Wi-Fi/internet access is strictly prohibited during the examination.**

Continue your previous **Shopee Philippines product list UI** replication in Angular. Extend it into a functional product browsing application.

Your output must demonstrate proper use of Angular components, HTML/CSS styling, TypeScript variables and data types, interpolation, arrays, `*ngFor`, event binding, functions, conditional rendering using `*ngIf`, and Angular Router.

Application Requirements

Your application must include the following:

1. Product Listing Page

- Replicate the provided Shopee Philippines product list UI.
- Display multiple product cards generated from a TypeScript array.
- Use appropriate HTML and CSS to reproduce the reference layout.

2. Interactive Product Cards

- Add at least one meaningful interaction to each product card.
- Examples include:
 - Add to cart
 - Favorite/unfavorite
 - Select a product
- The interaction must update the application's state.

3. Boolean States & Conditional UI

- Use boolean variables to represent product or application states.
- Use `*ngIf` to show or hide UI based on those states.
- Examples:

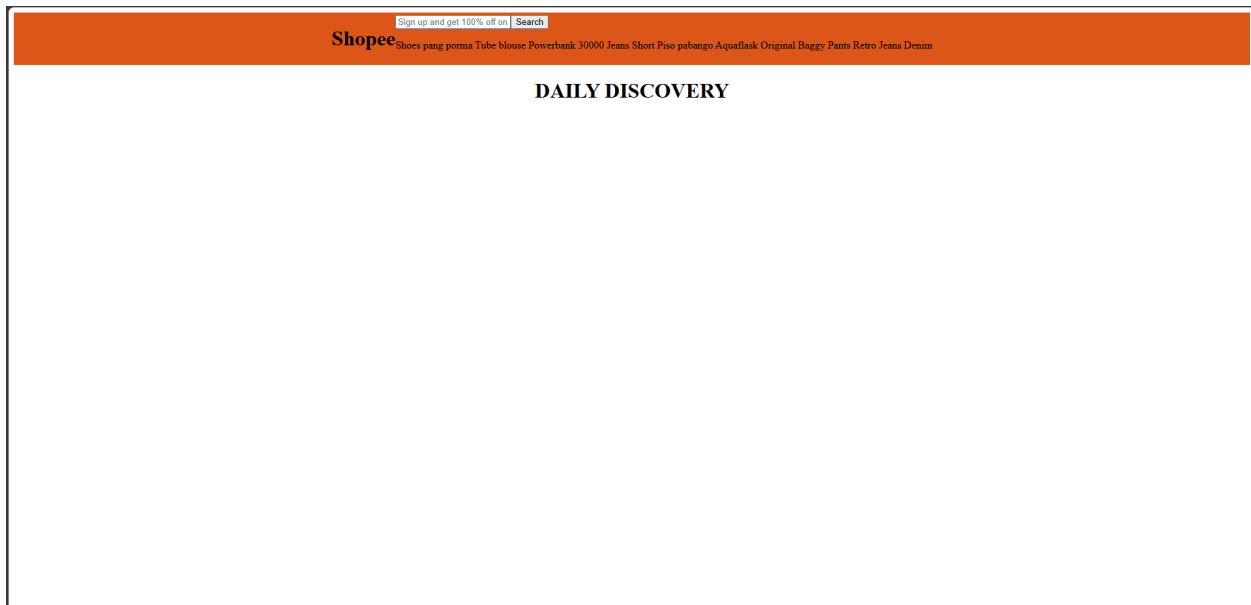

- Show a “**Favorited**” indicator when a product is favorited.
 - Show an “**Added to Cart**” indicator after clicking a button.
 - Display an appropriate message when no products are available.
 - The displayed UI must change based on the actual state, not just static text.
4. **Product Details Page**
- Use **Angular Router** to navigate from the product list to a separate product details page.
 - Clicking a product or a “**View Details**” button must navigate to its corresponding details route.
 - Display the selected product's information on the details page.
 - The Product Details UI may use any design.
5. **Fallback / Missing Data**
- Provide appropriate fallback text or UI when product information is missing.
 - Examples:
 - Missing product image → display a placeholder.
 - Missing product description → display "No description available."
 - Missing product name → display "Unnamed Product".

[Supporting Screenshots for Interactions & Fallback]

Criteria	Description	Points	Score
UI Replication & Styling	Accurately reproduces the reference Shopee Philippines product list UI's layout, product grid, spacing, sizing, typography, colors, cards, and major visual elements using HTML and CSS.	5	
Angular Structure & Syntax	Correctly structures the application using Angular components and demonstrates proper Angular/HTML syntax.	10	
TypeScript Variables & Data Types	Stores product information and application states in TypeScript variables/objects using appropriate data types rather than directly hardcoding data into the template.	15	
Interpolation	Correctly uses <code>{{ }}</code> to display dynamic product information throughout the interface.	10	
Arrays & <code>*ngFor</code>	Uses an array containing multiple product objects and <code>*ngFor</code> to dynamically render the product cards.	10	
Event Binding & Interactions	Correctly uses event binding such as <code>(click)</code> to respond to user interactions and update the application state.	10	
Boolean States & <code>*ngIf</code>	Uses boolean states and <code>*ngIf</code> to conditionally display or hide interface elements based on actual application data or interaction states.	10	

Angular Router & Navigation	Correctly configures routes and navigates from the product listing page to a separate product details page, displaying the appropriate product information.	10	
Functions & Logic	Implements functions that perform the intended actions, such as favoriting, adding to cart, selecting products, or handling navigation.	10	
Fallback / Missing Data	Provides appropriate fallback content when product information is unavailable or missing.	10	
TOTAL		100
